

**BUFFER ZONE PROTECTION PLAN**  
**for the property of:**

\_\_\_\_\_

The timber to be harvested is located \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

The woodland consists of \_\_\_\_\_ size trees with a total basal area of \_\_\_\_\_ square feet per acre. To leave a residual stand of \_\_\_\_\_ square feet per acre, \_\_\_\_\_ square feet per acre was marked for removal. All trees to be removed are marked with \_\_\_\_\_ at 4½ feet above ground and at stump level. The operator will remove all felled trees and all tops and lops out of the designated stream.

The boundary of the buffer strip is marked with \_\_\_\_\_. The area varies in width from \_\_\_\_\_ to \_\_\_\_\_ feet, depending on the slope of the affected area.

Harvesting within the buffer zone shall conform to the Buffer Management Plan criteria as required by the "*Soil Erosion and Sediment Control Guidelines for Forest Harvest Operations in Maryland*", prepared by the Maryland Department of the Environment.
